Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • "Creating engaging captions every day takes too much time." • "I need content that matches different social media platforms." • "I want better hashtags to increase my post reach."	THINKS • "Will this content attract more audience engagement?" • "I need professional-quality captions without spending hours writing." • "How can I maintain consistency across all my social media posts?"
PERSONA NAME Sarah Johnson <i>(Social Media Manager / Content Creator)</i>	
DOES • Creates and schedules social media posts regularly. • Searches online for caption ideas and trending hashtags. • Experiments with different content styles and tones to improve engagement.	FEELS • Frustrated when unable to create creative content quickly. • Stressed due to tight posting schedules and deadlines. • Excited when posts receive high engagement and positive feedback.
